backend

angular, python, flask, git, firebase, sql, bash, c++, java, micropython, heroku

design

adobe illustrator, photoshop, figma

languages

cantonese & mandarin

work

projects

2024 – building the digital & accessible experience for *Healing Justice Lineages* | HJL, Brooklyn (remote)

wordpress, php, javascript, html, css

2018 – built a website in react for *Superdiversity* | Stamen Design, San Francisco

html, css, javascript, react, d3.js

2017 – built a LMS for *legal workers* | Farber & Co., Oakland

wordpress, javascript, html, css, php

roles

2024 – Lead Code Mentor | *The Coding Lab*, Brooklyn

♦ organized 4 artist talks; invited professionals from the creative coding community to engage students with their work.

♦ led the *hacking with the browser* workshop every semester, introducing undergraduate and graduate students to APIs, and how to hack websites using the browser developer tools.

2022 – UX Engineer | MITRE, Boston

html, css, typescript, javascript, angular, python, vue.js, alpine.js, tailwind

♦ collaborated on 4 projects with multiple teams, as consultant and developer on UX—from design to development—for full-stack web applications.

♦ responsible for *frontend architecture design for a new web application working with python RESTful APIs* to be used by cybersecurity professionals and researchers.

♦ built the *dark mode, search, and filter features for the ATT&CK® Navigator*, an open-source cybersecurity database.

2020 – Frontend Engineer | *Charles Schwab* (Digital Accelerator), San Francisco

html, css, typescript, javascript, angular, node.js, jasmine

♦ built high-fidelity angular prototypes for user research tests.

♦ iterated with the design and accessibility teams to build a *wcag-compatible web application used by 150,000+ clients*.

♦ developed features and wrote unit tests for a robust, *full-stack web application in angular*.
